Female Testing Checklist

- Egg Testing** /blood test (Cycle Day 2,3,4 or 5) Ovarian Reserve Testing (AMH, FSH, LH, etc.) called “Day 3 Bloodwork or egg test”
- Physical / Doppler scheduled at any time. (blood flow test) usually same day as Day “3” blood work
- HSG (Fallopian Tubes) Cycle Day 7-11 or while on birth control pills (pills start on cycle day 3)
- HSS (Uterine Testing) Cycle Day 7-11 or while on birth control pills (pills start on cycle day 3)
- Scope (Uterine Testing) Cycle Day 7-11 or while on birth control pills (pills start on cycle day 3) “gold standard” for IVF treatments**
- Blood Work:
 - Screens (ID) Hepatitis A, B, C , RPR, HIV CMV(if donor sperm)
 - PCOS blood workup or if have irregular periods same workup
 - Thyroid panel (TSH, T4, T3 and Antithyroid antibodies)
 - Testosterone if over 40
 - Prolactin
 - Recurrent Pregnancy Loss if more than two miscarriages see Chromosomes below
 - PLUS Chromosomes (if genetic screening is selected)
 - Your sperm provider will have his Chromosomes tested also

To prepare for testing, we recommend that you hydrate as much as possible.

Drink plenty of water to help purify your system. We are looking for urine that has been clear for a few days.
